

② Setup k8s cluster using vagrant

↳ virtual box as provider/plugin

↳ all previous steps taken but from shell scripts and automated using vagrant

2.1

Vagrant → k8s cluster

kvm Libvirt

virtual machine manager

— `vagrant up --provider libvirt`

OR

`EXPORT VAGRANT_DEFAULT_PROVIDER = libvirt`

OR

`ENV VAGRANT_DEFAULT_PROVIDER = "libvirt"`

↳ in Vagrantfile

— will work similar to virtualbox provider
